sensiFIT

This hiking shoe is easy on the way up, even better on the way down.

Designed for women, the best selling X ULTRA 3 has evolved into an even better hiking shoe. Thanks to Descent Control technology, this shoe easily tackles technical hikes and really shines during tough descents. The upper breathes well in warm weather and stands up to the most rugged trails.

Foothold

A refined, women's specific last works with the reinforced top arm of the sensifit, holding your foot comfortably in place, especially moving downhill.

Stability and cushioning

An asymmetrical chassis designed to accommodate a woman's anatomy maximizes stability and cushioning while minimizing fatigue on rugged terrain.

Grip

Two different types of rubber result in better grip. A patterned area on the heel grabs terrain more aggressively, giving you more control especially on descents.
