Trail running ride and climbing capability for technical, alpine terrain.

Take your mountain running to a higher plane with the XA ALPINE PRO. Built with all the precise foothold and ride you expect from a Salomon running shoe, it has a Carbon Edging Chassis and climbing zone in the sole for stability and grip while scrambling, and the upper is reinforced with a light, durable film for rugged terrain.

Trail running capability

Utilizing Salomon's trail running expertise, this shoe offers the ride and precise foothold you want for running technical trails.

Climbing grip

The sole is built with Contagrip® TA for maximum grip on rocky surfaces, and a climbing area under the 1st and second meta are built for scrambling.

Durability

The upper is reinforced in high-wear areas, to stand up to rugged scrambles and technical trails.
