## The rebirth of Salomon's legendary trail shoe with unmatched grip and fit.

To create the next generation SPEEDCROSS 5, we went back to the source code, capitalizing on the values that make SPEEDCROSS legendary. Even more grip, and a more dynamic upper set a new high-bar on performance and fit. And with better stability and a refined look, a new legend has arrived.

### Grip

The sole of SPEEDCROSS 5 has larger lugs with more space and an updated geometry, delivering better push-off grip and braking grip, in all surface conditions.

### Stability

The heel unit of SPEEDCROSS 5 creates a cradle for your heel, ensuring clean foot strike and stability through the stride.

### Fit

SPEEDCROSS 5 uses a completely welded upper, with dissociated sensifit arms. It moves more naturally with your foot, and dials in the comfort.

### Scales & Specif

- Breathability : 3/6
- Cushioning : 5/6
- Lightness : 2/6
- Protection : 5/6
- Stability : 4/6
